Experience

Software Engineer

Jul 2025 - Present

SPS Commerce (acquired SupplyPike in 2024)

Rogers, AR

- Leading SupplyPike's Auth0-to-SPS identity migration as primary technical owner across applications and teams.
- Unified account linking, invitations, permissions, SSO, and machine-to-machine access under SPS identity.
- Built Databricks aggregations that normalize retailer data for shared exports and recovery workflows.
- Built and maintained TypeScript/Node.js services and RabbitMQ workers across PostgreSQL and MongoDB.

Associate Software Engineer

Jul 2024 - Jul 2025

SPS Commerce / SupplyPike

Rogers, AR

- Cut application load times by -44% through targeted database indexing and elimination of N+1 queries.
- Owned shared React navigation used across products, including authentication context, hooks, and utilities.
- Standardized revenue-loss and billing data models used by multiple retailer integrations and product teams.

Software Engineer Intern

May 2023 - Jul 2024

SupplyPike

Rogers, AR

- Built a configurable React/TypeScript settings experience for a revenue-loss analytics dashboard.

Information Technology Intern

May 2022 - Jul 2022

IDEMIA

Nashville, TN

- Supported employee hardware, software, Active Directory, Microsoft 365, and mobile-device provisioning.

Education

University of Alabama in Huntsville

Huntsville, AL

B.S. Computer Science, Minor in Mathematics

Aug 2021 - May 2024

- GPA: 4.0 / 4.0 | Summa Cum Laude | Honors College | National Merit Scholarship

Projects

Creator & Developer, Golf Club Curator ([pre-alpha](#))

Apr 2026 - Present

- Building a TypeScript platform that compares golf-club specs, merchant offers, and complete bag configurations.
- Architected a TanStack Start monorepo with Better Auth, Drizzle/PostgreSQL, and shared React packages.
- Designed domain models and workflows for bag compatibility, saved configurations, merchant offers, and affiliate attribution.

Technical Skills

- **Languages & frontend:** TypeScript, JavaScript, React
- **Backend & data:** Node.js, Koa, REST APIs, PostgreSQL, MongoDB, Redis, RabbitMQ, Databricks
- **Infrastructure:** Docker, Kubernetes, GitHub Actions, CI/CD, Auth0, OpenTelemetry, Sentry
